Unit 1 > Homework 1 > HW1: Submission

HOMEWORK 1 SUBMISSION

(2/20 points)

Run your HW1 solution with "input.txt" as the command line argument. "input.txt" is our case file.

In the Visual Studio skeletons, the command line argument is already specified (under Project > Properties > Configuration Properties > Debugging > Command Arguments). On OSX/Linux, this can be done by running `./transforms input.txt` in the homework directory. The skeletons already have the "input.txt" file in the correct location.

Once the program starts, press `i` and the program will automatically output all the required images (such as "input.txt.001.png"). Finally, add the images to a zip archive "hw1.zip" and submit this zip archive. Partial submissions are allowed, but you will only receive credit for the images you submit. Please remember to include *Transform.cpp* (while we are grading based on images, we do want to beta test code grading).

Submit a zip file named `hw1.zip` containing some or all of the following files: *Please note that the grader may take a minute or two to run, please be patient.*

- Transform.cpp
- input.txt.000.png
- input.txt.001.png
- input.txt.002.png
- input.txt.003.png
- input.txt.004.png
- input.txt.005.png
- input.txt.006.png
- input.txt.007.png
- input.txt.008.png
- input.txt.009.png
- input.txt.010.png

- input.txt.011.png
- input.txt.012.png
